

Square Off Rules

- Liquidation triggers at 70% MTM loss intraday. Account can be liquidated at any point above 70%.
- 100% Holding margin required to carry positions overnight. Insufficient margin = auto liquidation.
- At liquidation, the position with the highest loss is squared off first.
- All orders (Market, SL, Limit) and liquidations execute on BID-ASK prices. Chart highs/lows are NOT used for execution.
- Any disputes on liquidation or auto square off must be raised with Support within 15 minutes. No queries after that.
- Futures and Options have a locking period of 2 minutes; no trade can be squared off below this time limit.
